

Ada Lovelace

Software Engineer

ada@example.com · +1 555 0100 · github.com/ada

Summary

Backend engineer with 8 years building reliable, observable distributed systems. Comfortable owning a service end to end — design, implementation, on-call and the documentation everyone actually reads.

Experience

Staff Engineer — Acme Cloud

2021 – present

- Led the migration of the billing pipeline to an event-sourced design, cutting reconciliation incidents by **90%**.
- Mentored 6 engineers; introduced a lightweight RFC process now used company-wide.
- Reduced p99 API latency from 480 ms to 110 ms.

Senior Engineer — Nimbus Analytics

2017 – 2021

- Built the ingestion layer handling 2M events/sec on a team of three.
- Owned the public SDK and its documentation across Python, Go and Rust.

Skills

Area	Tools
Languages	Rust, Go, Python, TypeScript
Infrastructure	Kubernetes, Terraform, AWS
Data	PostgreSQL, Kafka, ClickHouse

Education

B.Sc. Computer Science — University of Cambridge, 2017
